

Enterprise Asset Management SaaS Solution

| IFS Ultimo

We empower
teamwork

With IFS Ultimo Enterprise Asset Management (EAM) software, you gain a better grip over your assets, realize higher uptime, control costs, and create a safe and healthy working environment. IFS Ultimo is well known for its rapid deployment, ease of use, seamless integrations, and unparalleled time to value.

IFS Ultimo gives manufacturing, logistics, and healthcare organizations, a flexible solution for all your asset maintenance and health & safety needs. A system that can grow with your organization and your needs. All in line with the size, maturity, and budget of your organization. It provides you with the certainty of a fitting solution in every situation. With many default functionalities. Based on world-class technology, IFS Ultimo can also be seamlessly integrated with other applications step-by-step as and when you need it.

You know exactly what assets you maintain. What costs are involved? And when you need to act for long-term maintenance, short-term activities, and replacement purchases of your assets. The certainty that you plan, execute, track and optimize activities and continually improve your processes. You want your investments to be used to their full potential. You want the certainty that you make decisions based on hard facts. Solid data that you can use to justify the costs and that clarify the performance of your assets. With IFS Ultimo, you see the vital signs, and you take vital actions.

See vital signs

Storage tanks of a chemical factory or refinery. Baggage carousels at the airport. CT scanners in the hospital. Locks and bridges in our national infrastructure. Your buildings and offices. They all require a solution so they can provide you with clear information. And this solution is called IFS Ultimo.

IFS Ultimo EAM software provides insight. It's easily accessible. Organized. And ready for follow-up steps. To keep your assets in top condition, or to compare them to your other assets. To guarantee their safety, and bring them up to standard. Or to attach reliable financial-economic conclusions. IFS Ultimo offers a SaaS solution with all the information about your assets. In real-time. All things that are of great importance to you. With software that can enrich data using the latest technologies: AI, IoT, AR/VR, and drone

inspections. So you always have clear information about your assets and their service processes at your disposal. IFS Ultimo has a wide range of features in the areas of Maintenance, Safety (EHS), Medical Asset, Infra Asset and IT Service Management. Based on practical use in collaboration with clients and other stakeholders. Combined into one ingenious EAM solution in which all your assets provide you with their information.

Take vital action

True asset management requires perfect harmony between humans and machines. With the right information. In the right place. At the right time. Information starts with your assets and ends with the action you take with regard to it. Here at IFS Ultimo, we make sure you can always aim high. For the best possible asset availability.

IFS Ultimo's EAM helps you make decisions based on facts, managing all your process in the best way possible based on indispensable information. You take action where you want. You determine what happens to the information at your disposal. So, IFS Ultimo ensures you have all imaginable data at your disposal. In one user-friendly solution. Even when the data

has to come from somewhere else. Link with Track & Trace? With Asset Performance Management? With Business Intelligence? With BIM? ERP? Digital Twins software? Whichever data enrichment you require, whatever KPIs you set, IFS Ultimo directs you to the right signals. So you can give the true response.

Improve maintenance, safety & collaboration

IFS Ultimo is a leading SaaS EAM solution focused on maintenance & safety with an unparalleled time to value. You know better than anyone that the right asset management can help you increase the value of your assets and directly influence your organization's company objectives. And you also know there really is only one EAM software solution for the job: IFS Ultimo.

Flexible. And out-of-the-box

We have been saying for years that it is possible. Powerful out-of-the-box software with predefined industry solutions. High-end software that is also flexible and can be adjusted to your preferences. You, our user, were and still are our greatest source of inspiration for developing software that combines these two extremes. Our innovative strength of about thirty-five years ago made it our philosophy. And now, with our world-class technology, we continue to prove it.

From mobile to desktop

What if you could access IFS Ultimo EAM easily on any device? Would this result in a higher hands-on tool time? Yes. And would this also benefit the reliability of the management information? Yes. Even more real-time because you can enter or consult data easily at the right time? Yes. Exactly. That's why our user-friendly platform can be used on desktop, tablet and smartphone.

Business reporting

The right decisions. You make them based on the solid information you retrieve from the IFS Ultimo EAM solution. Monitor your performance effectively and continually improve your processes. End users quickly retrieve operational information using a simple reporting tool. Various standard reports are available for tactical and strategic issues. And, on top of that, a powerful Microsoft Power BI integration for thorough analyses.

Optimal planning

IFS Ultimo provides no fewer than seven planners that can be used separately but can most certainly also be combined smartly. With planners that have been specially developed for long-term planning and planners that take care of the short term. To stay in control. You create insight and clear visualization. Create a realistic forecast of costs and hours. Use the Asset Planner for an overview of the maintenance activities per asset. The Stop Planner is the right tool to schedule shutdowns and related activities. Use the Job Planner for a detailed workforce schedule and Kanban boards for lean and agile teamwork. With the Periodical Maintenance Planner, you have insight into your periodical maintenance. These planners complement each other well.

Link with smart innovations

IFS Ultimo has default certified links, like with SAP, and realizes robust and maintainable customer-specific links. Data-driven decision-making is the biggest game-changer in Asset Management. So, IFS Ultimo provides you with seamless integration to practically every application that helps you to maintain your assets. Whether it is Asset Performance Management, IoT/OT, Augmented Reality, drone inspections, Document Management, ERP, HR, CAD, BIM, or GIS, IFS Ultimo links with it.

You can find more information, inspiration, and examples on our Marketplace (marketplace.ultimo.com).

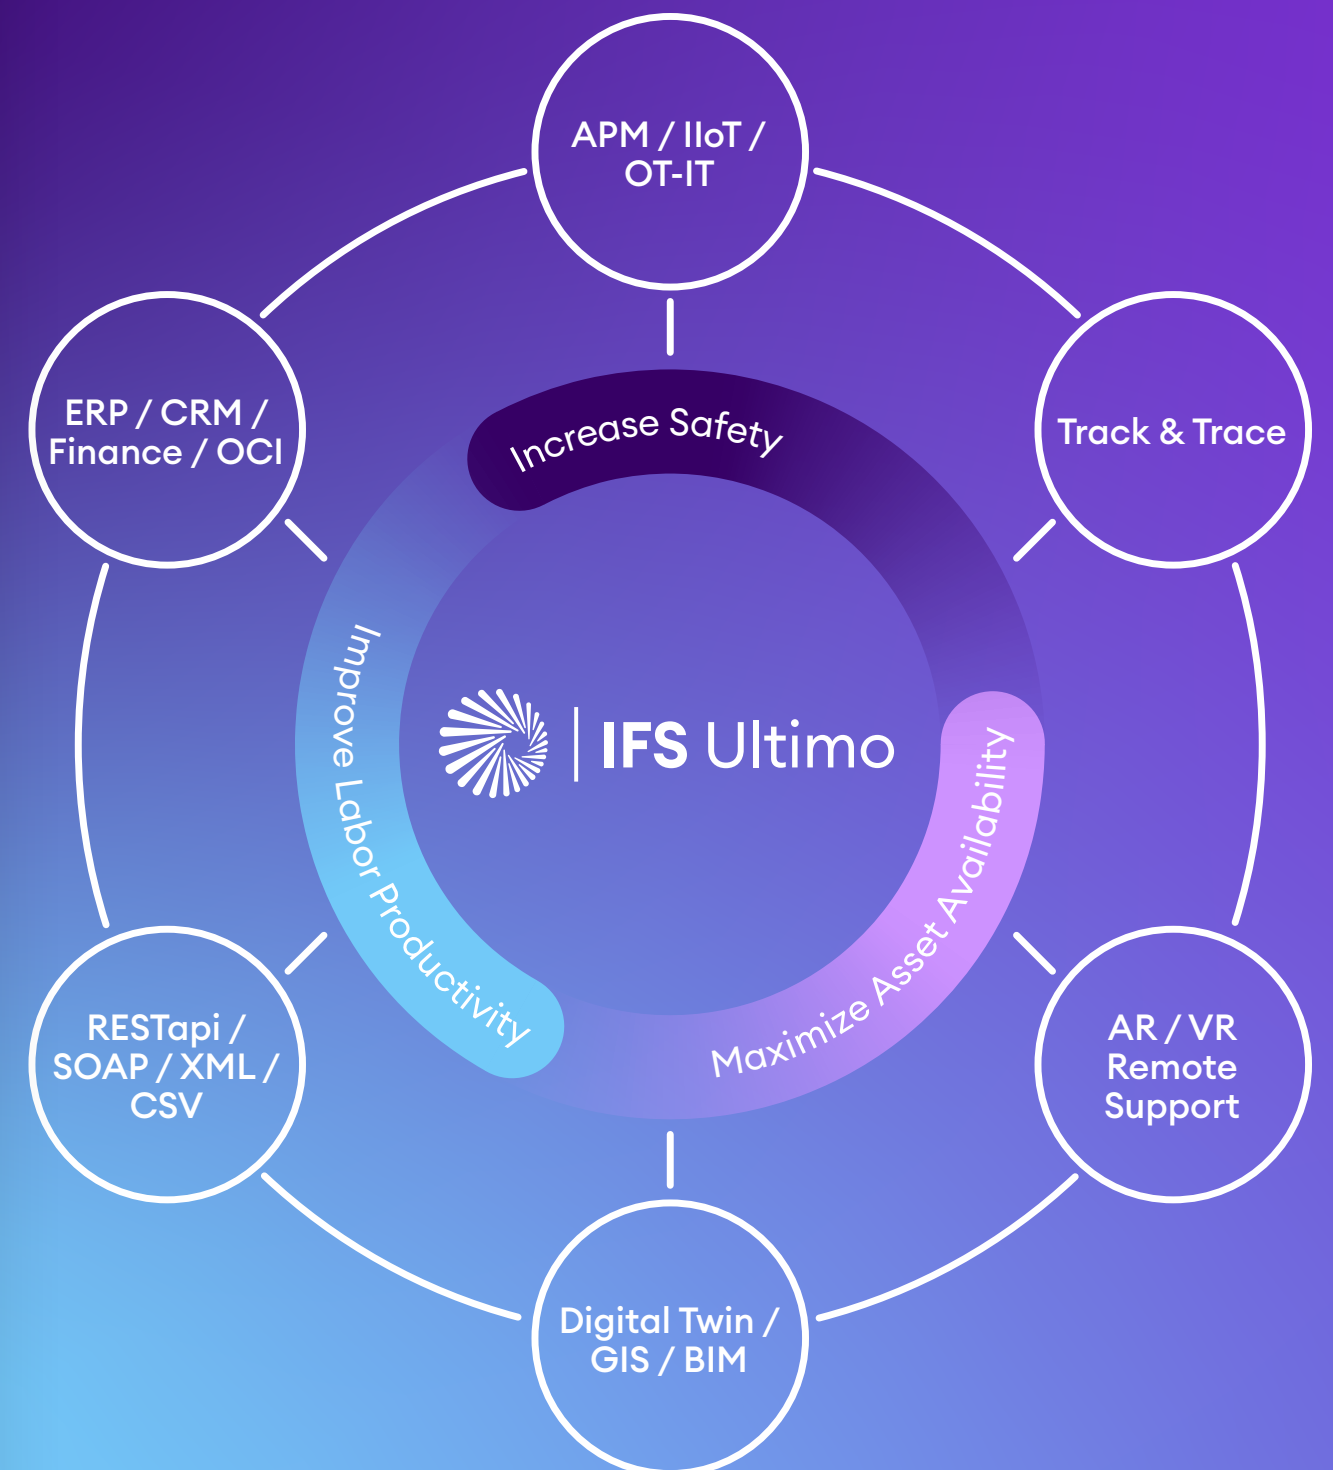

EAM and more

IFS Ultimo default has many rich EAM functionalities already. Think of scheduling, optimizing, executing, and tracking the required maintenance activities with the corresponding priorities, skills, materials, tools, and information – either for fixed or moving assets. And how about our fully integrated and comprehensive suite for Health, Safety & Environment (HSE)? This includes HSE Incident Management, Management of Change, Work Permits, Task Risk Assessment, and Lockout Tagout.

To further improve collaboration and efficiency, our software also offers an extensive Operations suite. This suite contains accessible functionality to involve operations/productions with EAM, gather information, and set up your processes even better. Think of Shift Handover, Downtime Registration, and Autonomous Maintenance.

And we offer integrated modules in the fields of IT Service Management to facilitate your IT supporting processes.

Our software is fully scalable. And you can choose from three product versions, ranging from 'Professional' to 'Enterprise'. Always the right support. Always fitting for your needs. Always within your budget.

Unmatched Return on Investment

- 3 editions rich in functionality
- Scalable growth possible
- Usability increases hands-on tool time, improves management information
- Broad functionality prevents islands of automation and increases cross-functional synergy
- Fast implementations with out-of-the-box industry solutions
- Application of industry-specific expertise in our implementations
- Various integration options available that are easy to set up and manage
- Cost-effective flexibility because of Self-Service application management
- High-quality SaaS Solution for maximum performance

Always the right support. Always fitting for your needs.

IFS Ultimo software is fully scalable. You can now choose from different subscriptions (you can find the details on our website). With predefined industry solutions for a guaranteed best-practice solution for your branch. Out-of-the-box and incredibly flexible at the same time. Experience unparalleled ROI because of short implementation processes, seamless integrations, and self-service application management.

Professional

For organizations that want to benefit from a complete out-of-the-box solution for EAM. Industry solutions are available for Technical Asset Management and Medical Asset Management.

Premium

For organizations that want to have access to all advanced EAM options. Industry solutions are available for Technical, Medical, Fleet, and Infra Asset Management.

- Flexibility level 'Supreme'
- Premium support

Enterprise

For larger organizations that want access to all options of the complete platform and want to get the most out of IFS Ultimo. No options. Everything is included and complete.

- Flexibility level 'Supreme'
- Platinum 24-7 support for the best possible support

All product versions can be used in a multiple-company structure (multisite) and have optional support for multiple languages (English UK/US, German, French, Dutch, Italian, Portuguese (Brazilian), Polish, Spanish, Swedish, Danish, Norwegian, Turkish). Premium and Enterprise also have the options for multicurrency and multi-time zone.

Case studies

Who better to tell you what IFS Ultimo's EAM does for our customers than our customers themselves?

Our 2200+ customers are active in the industry, logistics, healthcare, infra, and utilities sectors all over the world. We are very proud that they use IFS Ultimo to achieve considerable positive results.

Results that help them work more efficiently, improve their performance, generate more insight or increase safety on the shop floor. You can find the results of several prominent customers here.

Check ultimo.com for more case studies.

London Gatwick

25% efficiency gains

“

With the achieved improvement of efficiency and productivity, we expect IFS Ultimo to have a payback time of about three to four years.”

“IFS Ultimo helps us plan effectively and make the right decisions to maximize the value of assets. IFS Ultimo also increases efficiency and productivity and improves the performance and availability of our assets.”

“

25% efficiency gains seem very realistic to me.”

“Colleagues spend their time more effectively and have more time left for other important matters. So there is more available tool time because the administrative load has been diminished. The colleagues on the shop floor and the management make good use of the system.”

Tony Embling, Senior Engineering Manager

Kisuma Chemicals

40% downtime reduction

“

We achieved this with a well-considered FMECA strategy and its professional registration in IFS Ultimo. Simultaneously, we have also lifted work safety to a higher level with the broad use of different HSE modules. Our company now sees the professional approach to asset management as a revenue model, and no longer looks at the assets as just expenses.”

Jan Wolf, Reliability Engineer

University Hospital Brussels

Control over > 50,000 medical assets

University Hospital Brussels uses IFS Ultimo to manage thousands of medical assets and has increased efficiency and safety. The software has contributed to them being accredited by the Joint Commission International.

The software is integrated with ERP and a central knowledge and content platform for medical technology with predefined models for risk management and maintenance management. The software is also used integrally in other technical, logistic, and facilities departments.

Freiberger

10% savings on maintenance costs

“

Freiberger is the biggest manufacturer of frozen pizzas and similar products in Europe. Our technical department has made considerable progress with the use of IFS Ultimo. Not only in terms of performance, but also in terms of verification. I think we have already been able to save 10% on maintenance costs."

"The system was implemented very professionally and is used enthusiastically by our colleagues. We now have access to valuable data used in our operations."

Dr Heidi Pichorner, Technical Coordinator

Edeka, Minden-Hannover

Transparency in the costs of logistics management

EDEKA Minden-Hannover manages over 1000 lorries/trailers, 800 cars, and almost 4000 forklifts in their 20 regional sites and 7 workshops. The logistic management of the largest regional company of the supermarket chain is housed in the IFS Ultimo software. The software has provided transparency in the costs of management and maintenance.

Everything is clear with just a few mouse clicks. The users like working with the system. One particularly valued aspect of the software is its flexible nature.

Rijnland District Water Board

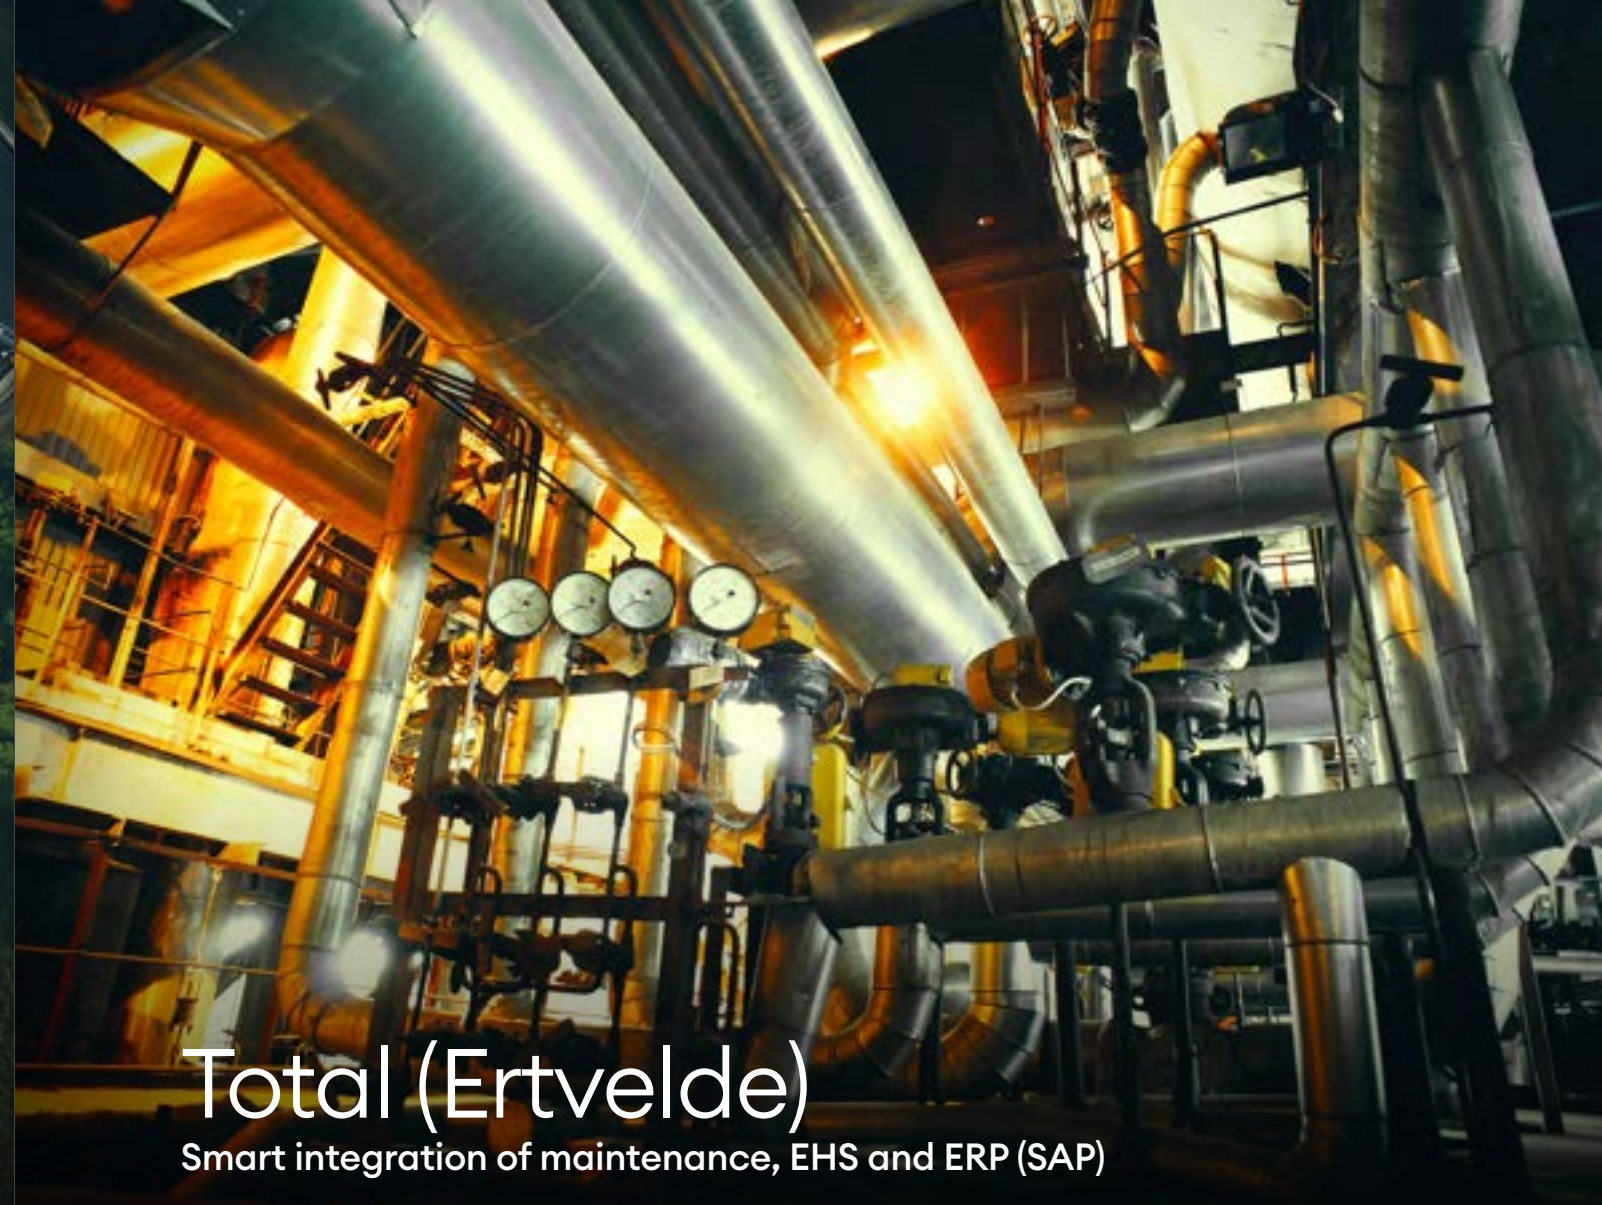

High-level operational and strategic asset management

“

With the Long-Term Asset Planning module, maintenance is viewed on a higher abstraction level, making us a valued sparring partner for the management of the organization."

"The Long-Term Asset Planning module allows us to draw up a long-term budget for assets, based on costs, conditions, and risks. This way, the district water board gets more insight into the financial consequences of keeping the condition of certain assets above the minimum condition. Thus, well-founded choices based on facts can be made from both a financial and practical perspective. The district water board manages thousands of assets in the field. The efficiency of the work has been further increased by working with the app IFS Ultimo GO and a smart interface with the GIS application ESRI."

Peter van Leijenhorst, Functional Manager

Total (Ertvelde)

Smart integration of maintenance, EHS and ERP (SAP)

“

With IFS Ultimo, we have one system for safety and maintenance issues, i.e., periodical maintenance, calibrations, and inspections. Everything is neatly organized in one place, making audits much easier. The interface with SAP helps with the efficient financial processing of our activities."

Steven Permentier, Production Manager

We empower teamwork

IFS Ultimo is an EAM SaaS solution focused on maintenance and safety with an unparalleled time to value, since 1988. IFS Ultimo bridges gaps between Maintenance, Operations, and HSE departments.

The software combines out-of-the-box industry solutions with supreme flexibility and still offers continuous delivery as a true SaaS solution. IFS Ultimo is well known for its rapid deployment, ease of use, and seamless integrations.

Why it really works

Here at IFS Ultimo, we have had the privilege to dive into the most EAM company processes over the last thirty-five years. In many different branches.

With a wide range of organizations. It constantly gave us the opportunity to make the right translations, into what has now grown into our flexible EAM SaaS Solution. Using our software to support company processes is our calling. We not only make it, but we also support our customers with fast implementations. We train them so they can use our software as efficiently as possible. With a sophisticated and user-friendly e-learning program. We can call it 'world-class technology'. Because it offers our customers out-of-the-box software, combined with the flexibility they need. Because it is software that grows with them. Because they keep achieving demonstrable results. That is really why IFS Ultimo is successful.

In addition to our software, we offer a full range of services:

- Implementation & services
- Support
- E-learning
- Customer success
- A global partner ecosystem

About IFS Ultimo

IFS Ultimo is a SaaS EAM solution from IFS, focused on maintenance & safety and well known for a rapid deployment, ease of use, and an unparalleled time to value. Details about IFS Ultimo can be found at [Ultimo.com](https://ultimo.com).

About IFS

IFS develops and delivers cloud enterprise software for companies around the world who manufacture and distribute goods, build and maintain assets, and manage service-focused operations. Within our single platform, our industry specific products are innately connected to a single data model and use embedded digital innovation so that our customers can be their best when it really matters to their customers – at the Moment of Service™.

The industry expertise of our people and of our growing ecosystem, together with a commitment to deliver value at every single step, has made IFS a recognized leader and the most recommended supplier in our sector. Our global team of 5,000 employees every day live our values of agility, trustworthiness and collaboration in how we support thousands of customers.
